

The New Oakland Elementary School

An Open Letter to All Neighbors, Parents, and Friends of Oakland Elementary School

The New Oakland Elementary School construction is well underway, and progressing on schedule. Cumming | SMG is the construction management firm assisting the Charleston County School District with many of their projects, including Oakland Elementary.

As you can see in the above photo, the project has come a long way since summer break. 80% of concrete slabs are in place, 70% of masonry walls have been installed, and steel roof joists are presently being erected. Our next major milestones will be installation of brick, metal roof deck, and roofing. A major difference you will notice is the addition of four temporary classrooms in the front of the existing campus. These were provided to replace the portable classrooms in the rear of the campus that have been removed to make room for the new parking area.

Please feel free to contact me with any questions or concerns that you may have. My address and phone number are listed below. This letter, as well as frequent updates will be posted on the School District's website. Again, thank you in advance for your patience and understanding, and please know that we are available to address any concerns you may have regarding this project.
