Project Scope: Construction of a New Middle School to be built on a shared campus at the location of the current Jennie Moore Elementary School. The facility will be approximately 150,000 square feet on 20 acres, and have the capability of expanding to accommodate up to 1200 students. The building is designed to enhance the school's current magnet program of Science and Technology, by including a Pre-engineering lab and classroom area with adjacent outdoor instructional space. There are also nine science labs dedicated to Life Science, Earth Science, and Weather Science. After listening to the community comments, the design team has incorporated Community spaces for both indoor and outdoor events.
