Cumming|SMG

Architect:
Moseley Architects

Contractor:
Brantley Construction

The New Mamie P. Whitesides Elementary school is a State of the Art facility, built to replace the existing school located on Rifle Range Road in Mount Pleasant. The new facility is just over 96,000 square feet, and is designed for 800 students. Located on approximately ten acres of land, the school is also adjacent to a public recreation facility. The site allows for separate entrances and drop off areas for busses and cars.

The facility includes nine Pre-K and kindergarten classrooms, eight first grade classrooms, four each second, third, fourth and fifth grade classes, as well as self contained, resource, science, music, and art, along with three computer labs. There is a full media center with ample space for individual reading areas, smart board conference area, and computer access. The cafeteria is separated from the multipurpose area by a folding partition wall, allowing for separate activities, or a full size space that can be used for larger audiences. The design also allows for all kindergarten and first grade classrooms to have direct access to secure play areas. All outside entrances are controlled access.

Due to the close proximity of the Mount Pleasant Water Works facility, the design team was able to take advantage of a highly efficient mechanical system and not have to install a large chiller.

The delivery method for the project included an early site package, which allowed the site to be ready for construction upon the opening of bids for the building portion.

The building was completed in June of 2010.

PROJECT DATA

Design Completion:	July, 2008
Solicitation:	Sept. 2008
Building Construction Start:	Nov. 2008
Building Construction Completion:	July 2010
Square Footage:	96,000 SF
Site Size:	10 acres
Construction Cost:	\$16 million
Total Project Cost:	\$24.2 million
